

JOURNAL PAPERS

(Journals indexed in ISI-Web of Science)

1. F. Arroyo, S. G. Canaval, **V. Mitrana**, S. Popescu: On the computational power of networks of polarized evolutionary processors. *Information and Computation* 253: 371-380 (2017) ([Elsevier Inc. USA](#))
2. F. Arroyo, S. G. Canaval, **V. Mitrana**, J. R. Sánchez-Couso: Transducers based on networks of polarized evolutionary processors. *Theoretical. Computer Science* 682: 22-29 (2017). ([Elsevier B.V., Netherlands](#))
3. P. Bottoni, A. Labella, **V. Mitrana**: Prefix-suffix square reduction. *Theoretical. Computer Science* 682: 49-56 (2017)
4. P. Bottoni, A. Labella, **V. Mitrana**: Networks of polarized multiset processors. *Journal of Computer and System Sciences* 85: 93-103 (2017). ([Elsevier Inc. USA](#).)
5. S. Gomez-Canaval, **V. Mitrana**, J.R. Sanchez-Couso: Networks of splicing processors with evaluation sets as optimization problems solvers, *Information Sciences*, 369 (2016) 457-466. ([Elsevier Inc. USA](#)).
6. P. Pablo Alarcón, F. Arroyo, H. Bordihn, **V. Mitrana**, M Müller: Ambiguity of the Multiple Interpretations on Regular Languages. *Fundamenta Informaticae* 138(1-2): 85-95 (2015) ([IOS Press Netherlands](#))
7. F. Manea, C. Martín-Vide, **V. Mitrana**: Hairpin lengthening: language theoretic and algorithmic results. *Journal of Logic and Computation* 25(4): 987-1009 (2015) ([Oxford University Press](#))
8. M. Dumitran, J. Gil, F. Manea, **V. Mitrana**: Bounded Prefix-Suffix Duplication: Language Theoretic and Algorithmic Results. *International Journal of Foundations of Computer Science* 26(7): 933-952 (2015) ([World Scientific Publishing](#))
9. P. Bottoni, A. Labella, **V. Mitrana**: Accepting Networks of Evolutionary Picture Processors. *Fundamenta Informaticae* 131(2014): 337-349 ([IOS Press Netherlands](#)).
10. P. Pablo Alarcón, F. Arroyo, **V. Mitrana**: Networks of polarized evolutionary processors. *Information Sciences* 265 (2014): 189-197 ([Elsevier Inc. USA](#))
11. J. García-López, F. Manea, **V. Mitrana**: Prefix-suffix duplication. *Journal of Computer and System Sciences* 80(2014): 1254-1265 ([Elsevier Inc. USA](#))
12. F. Arroyo, J. Castellanos, J. Dassow, **V. Mitrana**, J-R. Sánchez-Couso: Accepting splicing systems with permitting and forbidding words. *Acta Informatica* 50(2013): 1-14 ([Springer-Verlag, Germany](#))
13. V. Diekert, S. Kopecki, **V. Mitrana**: Deciding regularity of hairpin completions of regular languages in polynomial time. *Information and Computation* 217(2012): 12-30 ([Elsevier Inc. USA](#))
14. M. Ito, P. Leupold, F. Manea, **V. Mitrana**: Bounded hairpin completion. *Information and Computation*, 209(2011) 368-382. ([Elsevier Inc. USA](#))
15. **V. Mitrana**, C. Târnuță: New bounds for the query complexity of an algorithm that learns DFAs with correction and equivalence queries. *Acta Informatica*, 48(2011) 43-50. ([Springer-Verlag, Germany](#))
16. J. Dassow, **V. Mitrana**, B. Truthe: The role of evolutionary operations in accepting networks of evolutionary processors. *Information and Computation*, 209(2011) 471-485. ([Elsevier Inc. USA](#))
17. F. Arroyo, J. Castellanos, **V. Mitrana**, E. Santos, J. M. Sempere: Filter position in networks of substitution processors does not matter. *International Journal of Foundation of Computer Science* 22(2011) 155-165. ([World Scientific Publishing, Singapore](#))
18. P. Bottoni, A. Labella, F. Manea, **V. Mitrana**, I. Petre: Complexity-preserving simulations among three variants of accepting networks of evolutionary processors, *Natural Computing* 10(2011) 429-445. ([Springer-Verlag, Germany](#))
19. F. Manea, M. Margenstern, **V. Mitrana**, M. J. Pérez-Jiménez: A new characterization of NP, P, and PSPACE with accepting networks of evolutionary processors, *Theory of*

- Computing Systems*, 46(2010) 174-192. (Springer-Verlag, Germany)
20. R. Loos, F. Manea, **V. Mitrana**: Small universal accepting hybrid networks of evolutionary processors, *Acta Informatica*, 47(2010) 133-146. (Springer-Verlag, Germany)
 21. **V. Mitrana**, I. Petre, V. Rogojin: Accepting splicing systems. *Theoretical Computer Science*, 411(2010) 2414-2422. (Elsevier B.V., Netherlands)
 22. F. Manea, **V. Mitrana**: Some remarks on the hairpin completion. *International Journal of Foundations of Computer Science*, 21(2010) 859-872. (World Scientific Publishing, Singapore)
 23. F. Manea, C. Martin-Vide, **V. Mitrana**: On some algorithmic problems regarding the hairpin completion, *Discrete Applied Mathematics* 157, 9(2009) 2143-2152. (Elsevier B.V., Netherlands)
 24. F. Manea, **V. Mitrana**, T. Yokomori: Two complementary operations inspired by the DNA hairpin formation: Completion and reduction, *Theoretical Computer Science* 410(2009) 417-425. (Elsevier B.V., Netherlands)
 25. R. Loos, F. Manea, **V. Mitrana**: On small, reduced, and fast universal accepting networks of splicing processors, *Theoretical Computer Science* 410(2009) 406-416. (Elsevier B.V., Netherlands)
 26. A. Choundary, K. Krithivasan, **V. Mitrana**: Returning and non-returning PCFA are equivalent, *RAIRO/Theoretical Informatics and Applications*, 17, 2(2007) 137-145. (EDP Sciences, France)
 27. F. Manea, C. Martin-Vide, **V. Mitrana**: On the size complexity of universal accepting hybrid networks of evolutionary processors, *Mathematical Structures in Computer Science*, 17, 4(2007) 753-771. (Cambridge University Press, UK)
 28. R. Loos, **V. Mitrana**: Non-preserving splicing with delay, *International Journal of Computer Mathematics*, 84(2007), 427-436. (Taylor & Francis, UK)
 29. C. Martin-Vide, **V. Mitrana**: Remarks on multiple pattern interpretations, *Information Processing Letters*, 101, 5 (2007), 209-214. (Elsevier B.V., Netherlands)
 30. P. Leupold, **V. Mitrana**: Uniformly bounded duplication codes, *RAIRO Theoretical Informatics and Applications*, 41, 4(2007) 411-424. (EDP Sciences, France)
 31. F. Manea, **V. Mitrana**: All NP-problems can be solved in polynomial time by accepting hybrid networks of evolutionary processors of constant size, *Information Processing Letters*, 103(2007), 112-118. (Elsevier B.V., Netherlands)
 32. C. Martin-Vide, **V. Mitrana**: Decision problems on path-controlled grammars, *International Journal of Foundations of Computer Science*, 18, 6(2007) 1323-1332. (World Scientific Publishing, Singapore)
 33. C. Drăgoi, F. Manea, **V. Mitrana**: Accepting hybrid networks with filtered connections, *Journal of Universal Computer Science* 13, 11(2007) 1598-1614. (Springer-Verlag, Germany)
 34. M. A. Grando, **V. Mitrana**: A possible connection between two theories: grammar systems and concurrent programming, *Fundamenta Informatica*, 76, 3 (2007), 325-336. (IOS Press, Netherlands)
 35. F. Manea, C. Martin-Vide, **V. Mitrana**: Accepting networks of splicing processors: complexity results, *Theoretical Computer Science*, 371(2007), 72-82. (Elsevier B.V., Netherlands)
 36. P. Bottoni, A. Labella, V. Manca, **V. Mitrana**: Superposition Based on Watson-Crick like complementarity, *Theory of Computing Systems*, 39, 4 (2006), 503-524. (Springer-Verlag, Germany)
 37. F. Manea, **V. Mitrana**, D.C. Voinescu: Synchronized shuffle on backbones, *Fundamenta Informaticae*, 73, 1-2 (2006), 191-202. (IOS Press, Netherlands)
 38. J. Castellanos, P. Leupold, **V. Mitrana**: On the size complexity of hybrid networks of evolutionary processors, *Theoretical Computer Science*, 330, 2 (2005) 205-220. (Elsevier B.V., Netherlands)
 39. P. Leupold, C. Martin-Vide, **V. Mitrana**: Uniformly bounded duplication languages, *Discrete Applied Mathematics*, 146, 3 (2005), 301-310. (Elsevier B.V., Netherlands)

40. **V. Mitrana**: Marcus external contextual grammars: from one to many dimensions, *Fundamenta Informaticae*, 54, 1-4 (2005), 307-316. (IOS Press, Netherlands)
41. E. Csuhaj-Varju, C. Martin-Vide, **V. Mitrana**: Hybrid NEPs are computationally complete, *Acta Informatica*, 41, 4-5 (2005), 257-272. (Springer-Verlag, Germany)
42. M. ter Beek, C. Martin-Vide, **V. Mitrana**: Synchronized shuffles, *Theoretical Computer Science*, 341 (2005), 263-275. (Elsevier B.V., Netherlands)
43. I. Ardelean, M. Gheorghe, C. Martin-Vide, **V. Mitrana**: A computational model for cell differentiation, *BioSystems*, 76(2004), 1-3, 169-176. (Elsevier B.V., Netherlands)
44. M. Gheorghe, **V. Mitrana**: A formal language based approach in biology, *Comparative and Functional Genomics* 5 (2004), 91-94. (John Wiley & Sons, Inc. USA)
45. J. Dassow, **V. Mitrana**, G. Paun, R. Stiebe: On functions and related languages of context-free grammars, *RAIRO/Theoretical Informatics and Applications*, 38 (2004), 257-267. (EDP Sciences, France)
46. M. ter Beek, E. Csuhaj-Varju, **V. Mitrana**: Teams of pushdown automata, *International Journal of Computer Mathematics*, 81, 2 (2004), 141-156. (Taylor & Francis, UK)
47. J. Castellanos, C. Martin-Vide, **V. Mitrana**, J. Sempere: Networks of evolutionary processors, *Acta Informatica*, 39 (2003), 517-529. (Springer-Verlag, Germany)
48. A. Atanasiu, C. Martin-Vide, **V. Mitrana**: On the sentence valuation in a semiring. *Information Sciences*, 151 (2003), 107-124. (Elsevier Inc. USA)
49. M. Kudlek, C. Martin-Vide, A. Mateescu, **V. Mitrana**: Contexts and the concept of mild context-sensitivity, *Linguistics and Philosophy*, 26, 6 (2003), 703-725. (Springer-Verlag, Germany)
50. **V. Mitrana**, K.G. Subramanian, M. Tataram: Pictural Networks of Evolutionary Processors, *Romanian Journal of Information Science and Technology*, 6 (2003), no.1-2, 189-199. (Publishing House of the Romanian Academy, Romania)
51. J. Dassow, **V. Mitrana**, A. Salomaa: Operations and language generating devices suggested by the genome evolution, *Theoretical Computer Science*, 270, 1-2 (2002), 701-738. (Elsevier B.V., Netherlands)
52. R. Freund, C. Martin-Vide, **V. Mitrana**: On some operations suggested by gene assembly in ciliates. *New Generation Computing*, 20, 3 (2002), 279-293. (Ohmsha Ltd., Japan)
53. C. Martin-Vide, A. Mateescu, **V. Mitrana**: Parallel finite automata systems communicating by states, *International Journal of Foundation of Computer Science*, 13, 5 (2002), 733-749. (World Scientific Publishing, Singapore)
54. C. Martin-Vide, **V. Mitrana**: Networks of evolutionary processors: a survey, *Theoria*, 18 (2003), no.46, 59-70. (University of the Basque Country, Spain)
55. **V. Mitrana**, R. Stiebe: Extended finite automata over groups. *Discrete Applied Mathematics*, 108, 3 (2001), 247-260. (Elsevier B.V., Netherlands)
56. S. Kobayashi, **V. Mitrana**, Gh. Paun, G. Rozenberg: Formal properties of PA-Matching, *Theoretical Computer Science*, 262, 1-2 (2001), 117-131. (Elsevier B.V., Netherlands)
57. C. Martin-Vide, **V. Mitrana**: Some undecidable problems for parallel communicating finite automata systems, *Information Processing Letters*, 77, 5-6 (2001), 239-245. (Elsevier B.V., Netherlands)
58. M. Ito, C. Martin-Vide, **V. Mitrana**: Group weighted finite transducers, *Acta Informatica*, 38 (2001), 117-129. (Springer-Verlag, Germany)
59. M. Kudlek, **V. Mitrana**: Closure properties of multiset languages, *Fundamenta Informaticae*, 49, 1-3 (2001), 191-203. (IOS Press, Netherlands)
60. E. Csuhaj-Varju, **V. Mitrana**: Evolutionary systems: A language generating device inspired by evolving communities of cells, *Acta Informatica*, 36, 11 (2000), 913-926. (Springer-Verlag, Germany)
61. J. Dassow, **V. Mitrana**: Finite automata over the free generated groups, *International Journal of Algebra and Computation*, 10, 6 (2000), 725-738. (World Scientific Publishing, Singapore)

62. E. Csuhaj-Varju, C. Martin-Vide, **V. Mitrana**, G. Vaszil: Parallel communicating pushdown automata systems, *International Journal of Foundations of Computer Science*, 11, 4 (2000), 633-650. (World Scientific Publishing, Singapore)
63. J. Kelemen, A. Kelemenova, C. Martin-Vide, **V. Mitrana**: Colonies with limited activation of components, *Theoretical Computer Science*, 244, 1-2 (2000), 289-298. (Elsevier B.V., Netherlands)
64. E. Csuhaj-Varju, **V. Mitrana**: Dynamical teams in eco-grammar systems. *Fundamenta Informaticae*, 44, 1-2 (2000), 83-94. (IOS Press, Netherlands)
65. C. Martin-Vide, **V. Mitrana**: Uniquely parsable CD grammar systems, *Journal of Universal Computer Science*, 6, 9 (2000), 850-861. (Springer-Verlag, Germany)
66. J. Dassow, **V. Mitrana**: Stack cooperation in multi-stack pushdown automata, *Journal of Computer and System Sciences*, 58 (1999), 611-621. (Elsevier B.V., Netherlands)
67. **V. Mitrana**: Parallelism in contextual grammars. *Fundamenta Informaticae*, 33 (1998), 281-294. (IOS Press, Netherlands)
68. C. Martin-Vide, **V. Mitrana**: Cooperation in contextual grammars, *Romanian Journal of Information Science and Technology*, 3 (1998) 231-241. (Publishing House of the Romanian Academy, Romania)
69. **V. Mitrana**: On the interdependence between shuffle and crossing-over operations. *Acta Informatica*, 34 (1997), 257-267. (Springer-Verlag, Germany)
70. J. Dassow, **V. Mitrana**: Cooperation in context-free grammar, *Theoretical Computer Science*, 180 (1997) 353-361. (Elsevier B.V., Netherlands)
71. **V. Mitrana**: Primitive morphisms. *Information Processing Letters*, 64 (1997) 277-281. (Elsevier B.V., Netherlands)
72. J. Dassow, **V. Mitrana**, A. Salomaa: Context-free evolutionary grammars and the structural language of nucleic acids. *BioSystems*, 4 (1997) 169-177. (Elsevier B.V., Netherlands)
73. **V. Mitrana**, Gh. Paun, G. Rozenberg, A. Salomaa: Pattern systems. *Theoretical Computer Science*, 154, 2 (1996), 183-201. (Elsevier B.V., Netherlands)
74. J. Dassow, **V. Mitrana**: Splicing grammar systems, *Computers and Artificial Intelligence*, 15 (1996), 2-3, 109-122. (Institute of Informatics, Slovak Academy of Sciences, Slovakia)
75. L. Ilie, **V. Mitrana**: Binary self-adding languages and sequences. *International Journal of Computer Mathematics*, 62 (1996), 171-181. (Taylor & Francis, UK)
76. **V. Mitrana**: Similarity in grammar systems. *Fundamenta Informaticae*, 24 (1995), 3, 251-257. (IOS Press, Netherlands)
77. **V. Mitrana**: On languages satisfying the "interchange lemma". *R.A.I.R.O./ Theoretical Informatics and Applications*, 27, 1 (1993), 71-79. (EDP Sciences, France)
78. **V. Mitrana**: Hybrid cooperating/distributed grammar systems. *Computers and Artificial Intelligence*, 12, 1 (1993), 83-88. (Institute of Informatics, Slovak Academy of Sciences, Slovakia)
79. E. Csuhaj-Varju, J. Dassow, **V. Mitrana**, Gh. Paun: Cooperation in grammar systems: universality, similarity, timing. *Cybernetics and Systems*, 36, 4 (1993), 271-286. (Taylor & Francis, UK)
80. A. Atanasiu, **V. Mitrana**: The modular grammars. *International Journal of Computer Mathematics*, 30 (1989), 17-35. (Taylor & Francis, UK).

JOURNAL PAPERS

(Journals indexed in other data bases)

1. S. Gómez Canaval, **V. Mitrana**, S. Alonso Villaverde: Transducers Based on Networks of Evolutionary Processors. *Journal of Automata, Languages and Combinatorics* 19(2014): 93-105 (Otto-von-Guericke University, Germany)
2. J. Dassow, **V. Mitrana**: Accepting networks of non-inserting evolutionary processors,

- Transactions on Computational Systems Biology*, 11(2009) 187-199. (Springer-Verlag, Germany)
3. C. Martin-Vide, **V. Mitrana**: Grammars with bounded-life resources, *Journal of Automata, Languages, and Combinatorics*, 7, 4 (2002), 561-570. (Otto-von-Guericke University, Germany)
 4. M. Kudlek, C. Martin-Vide, **V. Mitrana**: Multiple pattern interpretations, *GRAMMARS*, 5 (2002), 223-238. (Kluwer Academic Publishers, Netherlands)
 5. C. Martin-Vide, **V. Mitrana**, R. Stiebe: Weighted grammars and automata with threshold interpretation, *Journal of Automata, Languages, and Combinatorics*, 8, 2 (2003), 303-318. (Otto-von-Guericke University, Germany)
 6. A. Kelemenova, J. Kelemen, **V. Mitrana**: Towards Bilingualistics. New developments in formal language theory inspired from biology, *GRAMMARS*, 4, 3 (2001), 187-203. (Kluwer Academic Publishers, Netherlands)
 7. C. Martin-Vide, **V. Mitrana**, Gh. Paun: On the power of valuations in P systems, *Computacion y Sistemas*, 5,2 (2001), 120-128. (Instituto Politecnico Nacional, Mexico)
 8. **V. Mitrana**: On the degree of communication in parallel communicating finite automata, *Journal of Automata, Languages and Combinatorics*, 5, 3 (2000), 301-314. (Otto-von-Guericke University, Germany)
 9. C. Martin-Vide, **V. Mitrana**: Parallel communicating automata systems. A survey. Invited article in *Journal of Computational and Applied Mathematics* 7 (2), 2000, 237-257. (Springer-Verlag, Germany)
 10. **V. Mitrana**, G. Rozenberg: Some properties of duplication grammars. *Acta Cybernetica*, 14, 1 (1999), 165-177. (University of Szeged, Hungary)
 11. J. Dassow, **V. Mitrana**: D0L-pattern systems, *Publicationes Mathematicae*, 54 (1999), 653-666. (University of Debrecen, Hungary)
 12. **V. Mitrana**: Patterns and languages: An overview, *GRAMMARS*, 2, 2 (1999), 149-173. (Kluwer Academic Publishers, Netherlands)
 13. J. Dassow, **V. Mitrana**: On the leftmost derivations in cooperating grammar systems. *Revue Roumaine de Mathematiques Pures et Appliquees*, 43, 3-4 (1998), 361-374. (Publishing House of the Romanian Academy, Romania)
 14. **V. Mitrana**: Chomsky-Schutzemberger type characterizations based on contextual languages, *GRAMMARS*, 1 (1988), 167-176. (Kluwer Academic Publishers, Netherlands)
 15. A. Atanasiu, **V. Mitrana**: On the error-tolerant closure of languages, *Annals of the University of Bucharest, Mathematics-Informatics Series*, 47 (1998) 5-14. (University of Bucharest, Romania)
 16. **V. Mitrana**: Crossover systems. A generalization of splicing systems. *Journal of Automata, Languages and Combinatorics*, 2 (1997), 3, 151-160. (Otto-von-Guericke University, Germany)
 17. J. Dassow, **V. Mitrana**, Gh. Paun, S. Vicolov: On determinism in cooperating distributed grammar systems. *Publicationes Mathematicae*, 48 (1996), 3-4, 217-231. (University of Debrecen, Hungary)
 18. J. Dassow, **V. Mitrana**: "Call by name" and "call by value" strategies in grammar systems. *Annals of the University of Bucharest*, 1 (1996), 29-40. (University of Bucharest, Romania)
 19. **V. Mitrana**: Iterated pattern languages. *Journal of Automata, Languages and Combinatorics*, 1 (1996), 4, 305-311. (Otto-von-Guericke University, Germany)
 20. J. Dassow, **V. Mitrana**: Fairness in grammar systems. *Acta Cybernetica* 12 (1996), 331-345. (University of Szeged, Hungary)
